Web Design & Development

Duration : 2 Months

SUMMARY

Web design focuses on creating a website's look and feel via design tools while web development focuses on bringing that look and feel to life via programming languages.

WHO CAN JOIN?

- Anyone who can successfully complete 10+2 in any stream
- bachelor's degree or higher in fields like computer science, information systems, or engineering

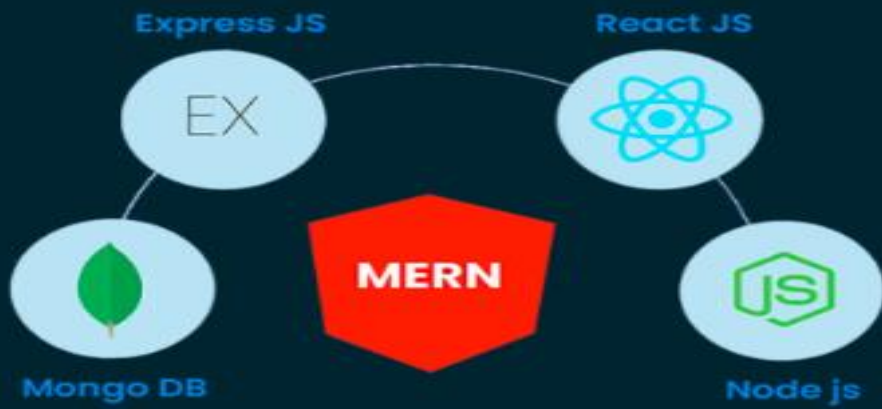

LEARNING OBJECTIVES

- HTML
- CSS
- Java Script
- JQuery
- Bootstrap

B133/1, 2nd Floor, ITI Estate, Whitefield Road, Mahadevpura Post, Bengaluru – 560 048

Call : 9901371386 / 6364657660 | <http://excerptech.com/trainings>

MERN Stack Development

Duration : 6 Months

SUMMARY

The MERN stack is a popular JavaScript framework used to build web applications. It's an acronym for the four technologies that make up the stack:

- MongoDB: Creates the database layer
- Express: Makes up the application layer along with Node.js
- React: Implements the presentation layer
- Node.js: Makes up the application layer along with Express

LEARNING OBJECTIVES

- Introduction to Web Development
- HTML Fundamentals
- CSS Fundamentals
- Introduction to JavaScript
- Frontend Development with React.js

- Backend Development with Node.js and Express.js
- Database Management with MongoDB
- Advanced React.js
- Full-Stack Application Development

WHO CAN JOIN?

Anyone who wants to learn MERN stack can join, including:

- Freshers and graduates
- Working professionals
- Business owners and freelancers
- Frontend developers and web designers
- Aspiring MERN stack developers
- Full-stack developers

Mobile App Development

Duration : 2 Months

SUMMARY

Mobile application development is the set of processes and procedures involved in writing software for small, wireless computing devices, such as smartphones and other hand-held devices.

LEARNING OBJECTIVES

- Introduction to Android
- Android Architecture
- Development Environment
- Android Data Storage
- SQL Data Storage
- Application Fundamentals
- Basic GUI Programming
- Layout Management
- Resource Management and Localization
- Intent and Intent Filters
- Application Menu
- Advance GUI Development

- Content Provider
- Broadcast Receiver
- Background Task Processing \$ Service

WHO CAN JOIN?

- People with a degree in Computer Science or Software Engineering are often well-suited for mobile app development.
- These programs cover topics like data structures, programming languages, algorithms, and software development methodologies.

B133/1, 2nd Floor, ITI Estate, Whitefield Road, Mahadevpura Post, Bengaluru – 560 048

Call : 9901371386 / 6364657660 | <http://excerptech.com/trainings>

django

Python Programming With Django

Duration : 3 Months

SUMMARY

- Django is a Python framework
- It is a good choice for certain projects
- It is based on the MVT design pattern
- It is built to help developers be efficient
- Django is built on Python
- It can help with automated testing

LEARNING OBJECTIVES

- Introduction to Python
- Working with Data Types and Variables
- Looping
- OOPS Concepts
- Strings
- Functions
- Files
- Exception Handling
- Database Connectivity

FRAMEWORK

- Intro to Django
- Object-relational mapper
- URLs and views
- Templates
- Forms
- Developmental process
- Authentication
- Admin
- Internationalization
- Security
- Tutorial
- Requests and responses
- Models and the admin site
- Views and templates
- Forms and generic views

PHP

Duration : 4 Months

SUMMARY

PHP is a preprocessor language. It can be used to assemble pages from smaller pieces, like an erector set. It can also execute logic, such as showing a sign-up form to new users, but bypassing it for known users.

LEARNING OBJECTIVES

- Highlights
- CMS
- Framework
- Architecture Concepts
- Database
- Testing
- Basics Concepts
- Front End
- Security
- Digging Deeper

WHO CAN JOIN?

Anyone can learn PHP, a general-purpose scripting language used for web development. There are no basic prerequisites for learning PHP, but some basic knowledge of HTML is recommended.

A screenshot of a code editor showing JavaScript code. The code includes a function 'b' that calls 'g(c,a)', a variable 'e' with a configuration object, and a 'PerformanceObserver' setup to monitor 'paint' events. It also shows an error handling function 'onerror' that pushes error details to a buffer.

```
function b(d){function g(c,a){var e={passive:!0,capture:!0,be:"error","bubbles":!0};window.perfMetrics||{};window.perfMetrics.configure({entryTypes:["paint"]});script type="text/javascript">function() {if ('PerformanceObserver' in window && 'PerformanceObserver' in window.__bufferedPerformance = [];var ob = new PerformanceObserver(function(e) {window.__bufferedPerformance.push.apply(window.__bufferedPerformance, e.entries);ob.observe({entryTypes:["paint"]});}window.__bufferedErrors = [];window.onerror = function(message, url, line, column, error){window.__bufferedErrors.push({message: message,url: url,line: line,
```

ASP.NET MVC

Duration : 2 Months

SUMMARY

ASP.NET MVC is a framework for building websites that uses the Model-View-Controller (MVC) design pattern to separate the user interface, data, and application logic.

LEARNING OBJECTIVES

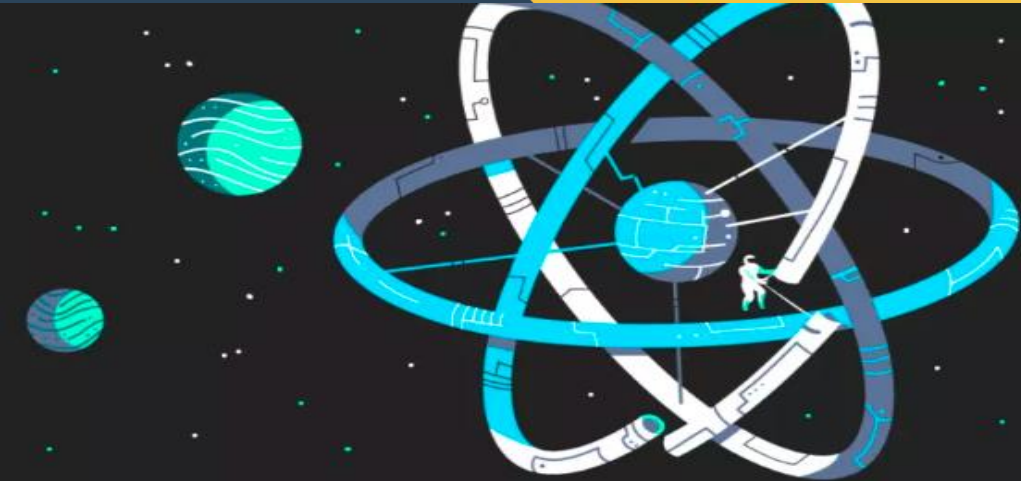

- Introduction to ASP.NET MVC
- Started with ASP.NET MVC
- Data Validation
- Razor View Engine
- URL Routing
- Controllers and Actions
- Filters
- View
- Helper Methods
- State Management
- Additional Techniques

WHO CAN JOIN?

Anyone with a basic understanding of C# and SQL can learn ASP.NET MVC. Some other skills that can be helpful include:

- HTML, CSS, and JavaScript
- SQL database
- Visual Studio

React JS

Duration : 45 Days

SUMMARY

React is a JavaScript-based UI development library. Although React is a library rather than a language, it is widely used in web development. The library first appeared in May 2013 and is now one of the most commonly used frontend libraries for web development

- State Management with Redux
- Context API and useContext Hook
- React Hooks

WHO CAN JOIN?

Anyone can learn React, but it's helpful to have a good knowledge of HTML, CSS, and JavaScript. It's also a good idea to have built some projects using these technologies

LEARNING OBJECTIVES

- Introduction to React.js
- Components and Props
- State Management
- Lifecycle Methods
- Handling Forms and User Input
- React Router
- Working with APIs

Angular

Duration : 45 Days

SUMMARY

Angular, a powerful front-end framework developed by Google, has revolutionized the way modern web applications are built. For newcomers to web development, Angular can seem to be a great choice due to its features, concepts, and terminologies.

LEARNING OBJECTIVES

- Introduction to Angular
- Building Blocks of Angular
- Routing and Views
- Forms and Validations
- HTTP Communication
- Advanced Directives
- Dependency Injection

- Advanced Topics
- Project Work

WHO CAN JOIN?

Whether you are a beginner or an experienced developer, our beginner-friendly Angular tutorial has got you covered. Starting from the basics, such as TypeScript, component architecture, and Angular CLI, to the advanced concepts such as Angular templates, data binding, and reactive forms.

Node JS

Duration : 45 Days

SUMMARY

Node.js is an open-source and cross-platform JavaScript runtime environment. It is a powerful tool suitable for a wide range of projects. Node.js stands out as a game-changer. Imagine using the power of JavaScript not only in your browser but also on the server side.

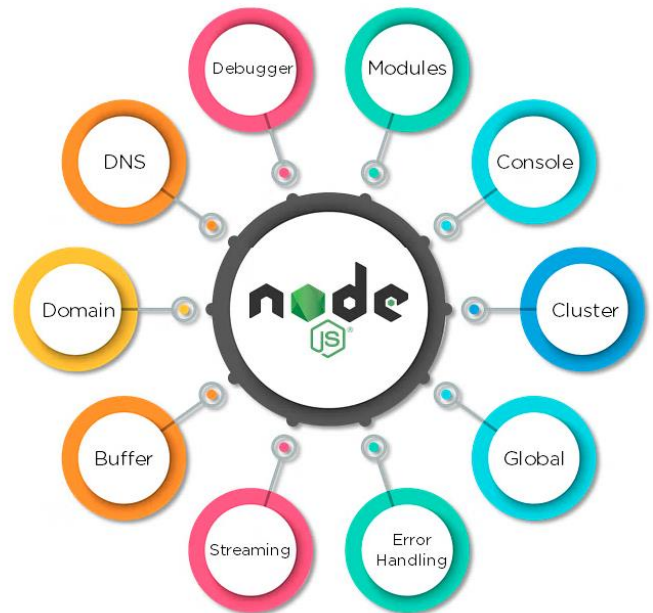

LEARNING OBJECTIVES

- Introduction to Node.js
- Working with Modules and Packages
- Asynchronous Programming in Node.js
- File System Operations and Streams
- Building Web Servers with Express.js

- Database Integration with MongoDB
- RESTful APIs with Express and MongoDB

WHO CAN JOIN?

Anyone can learn Node JS, but it's helpful to have a good knowledge in code. It's also a good idea to have built some projects using these technologies.

Data Science Using Python

Duration : 4 Months

SUMMARY

This Data Science Tutorial with Python tutorial will help you learn the basics of Data Science along with the basics of Python according to the need in 2024 such as data preprocessing, data visualization, statistics, making machine learning models, and much more.

LEARNING OBJECTIVES

- Introduction to the Data Science
- Different Sectors Using Data Science
- Data Analytics Overview
- The Data Analytics Process
- Exploratory the Data Analysis (EDA)
- Statistical Analysis
- Business Applications
- Statistical Analysis
- Non-Statistical Analysis
- Python Environment Setup and Essentials
- Data Types in the Python
- Basic Operators
- Functions in the Python
- Mathematical Computing with Python (NumPy)
- Mathematical Functions of (NumPy)
- Scientific computing with Python (SciPy)
- Data Manipulation with Pandas
- The Natural Language Processing with Scikit Learn
- Web Scraping with BeautifulSoup
- Python integration with Hadoop MapReduce and Spark

Machine Learning

Duration : 45 Days

SUMMARY

Machine Learning, often abbreviated as ML, is a subset of artificial intelligence (AI) that focuses on the development of computer algorithms that improve automatically through experience and by the use of data. In simpler terms, machine learning enables computers to learn from data and make decisions or predictions without being explicitly programmed to do so.

LEARNING OBJECTIVES

- Introduction to Machine Learning
- NumPy Basics for Data Handling
- Pandas Basics for Data Manipulation
- Introduction to scikit-learn
- Supervised Learning: Regression and Classification
- Unsupervised Learning: Clustering

- Model Evaluation and Validation Techniques
- Model Selection and Hyperparameter Tuning
- Feature Engineering and Selection
- Case Studies and Practical Projects

WHO CAN JOIN?

- Educational Background : Computer Science/IT Graduates, Engineering Graduates, Mathematics/Statistics Graduates.
- Programming Skills : Python Proficiency, Knowledge of other programming languages such as R, Java, or C++ can be advantageous.
- Analytical and Problem-Solving Skills
- Mathematical Aptitude

B133/1, 2nd Floor, ITI Estate, Whitefield Road, Mahadevpura Post, Bengaluru – 560 048

Call : 9901371386 / 6364657660 | <http://excerptech.com/trainings>

Data Analytics

Duration : 3 Months

SUMMARY

Data analytics is a multidisciplinary field that employs a wide range of analysis techniques, including math, statistics, and computer science, to draw insights from data sets. Data analytics is a broad term that includes everything from simply analyzing data to theorizing ways of collecting data and creating the frameworks needed to store it.

LEARNING OBJECTIVES

- Introduction to Data Analytics
- Excel for Data Analysis
- SQL Server Fundamentals
- Advanced SQL and SQL Server Integration
- Power BI for Data Visualization
- Data Visualization using Python
- Basic plotting techniques: Line plots, scatter plots, bar plots.
- Customizing plots
- Plotting categorical data
- Customizing axes and ticks
- Introduction to Seaborn library.
- Creating visually appealing statistical plots
- Integration with pandas DataFrame
- Creating plots: Line charts, scatter, bar plots
- Adding : Hover effects, tooltips, zoom

Power BI

Duration : 45 Days

SUMMARY

Power BI is a collection of software services, apps, and connectors that work together to turn your unrelated sources of data into coherent, visually immersive, and interactive insights. Your data might be an Excel spreadsheet, or a collection of cloud-based and on-premises hybrid data warehouses. Power BI lets you easily connect to your data sources, visualize and discover what's important, and share that with anyone or everyone you want.

LEARNING OBJECTIVES

- Introduction to Business Intelligence
- Basics of Excel and Database
- Power Query
- M Language
- Data Modeling
- DAX
- DAX Function
- Date and Time Functions
- Text Functions
- Logical Functions
- Visualizations

WHO CAN JOIN?

Anyone can learn Microsoft Power BI, a business intelligence tool that's useful for data analysis and visualization. It's especially recommended for people who work with large data sets, such as:

- Software developers
- Testers
- Business analysts
- Project managers
- BPO professionals
- Fresh graduates
- IT professionals

Database

SQL & Oracle

Duration : 3 Months

SUMMARY

A database is an organized collection of structured information, or data, typically stored electronically in a computer system. A database is usually controlled by a database management system (DBMS).

LEARNING OBJECTIVES

SQL:

- Introduction to RDBMS
- Overview of SQL Server
- Querying Data
- Querying Data by Using Joins and Subqueries
- Managing Databases and Tables
- Manipulating Data in Tables
- Implementing Indexes, Views, and Full-Text Search

- Implementing Stored Procedures and Functions
- Working with Triggers and Transactions
- Implementing Managed Code
- Monitoring and Optimizing Performance

WHO CAN JOIN?

Anyone can pursue a certification course in Database Administration. The minimum degree requirement to pursue any such course is Bachelor's but postgraduate students from any field and any level can join the institutes offering the basic level course.

Oracle:

Oracle 11g Module 1

- Introduction to RDBMS
- Introduction to Oracle
- Retrieving Data Using the SQL SELECT Statement
- Restricting and Sorting Data
- Using Single-Row Functions to Customize Output
- Using Conversion Functions and Conditional Expressions
- Reporting Aggregated Data Using the Group Functions
- Displaying Data from Multiple Tables Using Joins
- Using Subqueries to Solve Queries
- Using the Set Operators
- Manipulating Data
- Using DDL Statements to Create and Manage Tables
- Creating Other Schema Objects

Oracle 11 g Module 2

- Introduction to PL/SQL
- Declaring PL/SQL Variables
- Writing Executable Statements
- Interacting with Oracle Database Server: SQL Statements in PL/SQL Programs
- Writing Control Structures
- Working with Composite Data Types
- Using Explicit Cursors
- Handling Exceptions
- Introducing Stored Procedures and Functions
- Creating Functions and Debugging Subprograms
- Creating Packages
- Using Oracle - Supplied Packages in Application Development
- Using Dynamic SQL
- Design Considerations for PL/SQL Code
- Creating Compound, DDL, and Event Database Triggers
- Using the PL/SQL Compiler
- Managing PL/SQL Code
- Managing Dependencies

AWS

Duration : 2 Months

SUMMARY

Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted cloud, offering over 200 fully featured services from data centers globally. Millions of customers—including the fastest-growing startups, largest enterprises, and leading government agencies—are using AWS to lower costs, become more agile, and innovate faster.

LEARNING OBJECTIVES

- Introduction to AWS
- Elastic Compute Cloud Essentials
- EC2 Instances
- Elastics Block Store (EBS)
- Elastic Load Balancer
- Auto Scaling
- Cloud Watch
- Simple Notification Service
- Simple Storage Service (S3)
- Chatter API
- Glacier Storage
- Creation of User Accounts in AWS
- Virtual Private Cloud (VPC)
- Amazon Route53 Hosted Zones
- Rational Database Service (RDS)
- Simple Email Service
- Cloud Formation
- Monitoring and Optimizing Performance

Ethical Hacking

Duration : 45 Days

SUMMARY

Ethical hacking is a practice that involves using the same techniques as malicious hackers to identify and fix vulnerabilities in a system's security. Ethical hackers are security experts who are paid by organizations to help protect their systems and data.

LEARNING OBJECTIVES

- Introduction to Hacking
- Foot Printing
- Network Scanning
- Network Enumeration
- System Hacking
- Malware Trojans
- Malware-Virus and Worms
- Packet Sniffers

- Social Engineering
- Dos / DDos Attacks

WHO CAN JOIN?

Ethical hackers are usually people with a bachelor's degree in computer science or a related field, and who have the following skills and experience:

- Technical skills
- Analytical and creative thinking
- Ethical standards
- Research skills

Digital Marketing

Duration : 3 Months

SUMMARY

Digital marketing, also called online marketing, is the promotion of brands to connect with potential customers using the internet and other forms of digital communication. This includes not only email, social media, and web-based advertising, but also text and multimedia messages as a marketing channel.

LEARNING OBJECTIVES

- Introduction to Digital Marketing
- Search Engine Optimization
- Search Engine Marketing (PPC)
- Digital Display Advertising
- Email Marketing
- Social Media Marketing (Part 1)
- Social Media Marketing (Part 2)
- Mobile Marketing

- Analytics
- Strategy and Planning

WHO CAN JOIN?

Anyone can learn digital marketing, including:

- Students
- Professionals
- Entrepreneurs
- Marketing managers
- Content marketers

B133/1, 2nd Floor, ITI Estate, Whitefield Road, Mahadevpura Post, Bengaluru – 560 048

Call : 9901371386 / 6364657660 | <http://excerptech.com/trainings>

JAVA Programming

Duration : 2 Months

SUMMARY

Java is a multi-platform, object-oriented, and network-centric language that can be used as a platform in itself. It is a fast, secure, reliable programming language for coding everything from mobile apps and enterprise software to big data applications and server-side technologies.

LEARNING OBJECTIVES

- Introduction to Java Programming
- Java Fundamentals
- Control Structures
- Object Oriented Programming
- Applet & Graphic Programming
- Socket Programming
- Packages and Interface
- Exception Handling
- Threading
- File Handling

- String Handling
- AWT & swing
- Working with JDBC
- Java Server Pages (JSP)
- Working with Servlets
- Introducing Event Handling and Filters
- JSP Tag Extensions and Standard Tag Library

WHO CAN JOIN?

Anyone can learn Java programming, even if they don't have any prior programming experience. To take a Java course, you should have completed 12th grade and have some basic knowledge of computers, programming languages, and computer applications.

C

Duration : 30 Days

SUMMARY

C is a general-purpose programming language with many uses, including:

- C is often used to develop system software.
- C is used to develop application software.
- C is used to develop embedded systems.
- C is used for network programming.
- C is used for system administration.

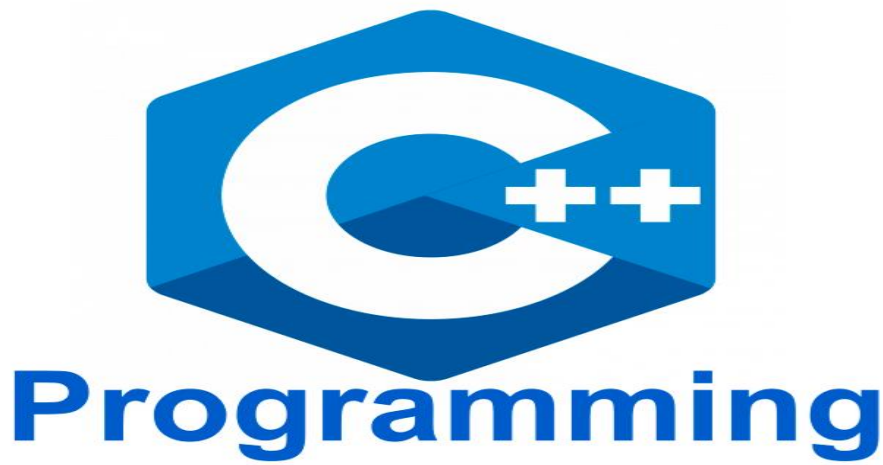

LEARNING OBJECTIVES

- Basic of C Programming
- Data Types and Variables
- Control Flow Statements
- Formatted IO Functions
- Functions and Program Structure
- Arrays, Pointers and String
- File Operations

WHO CAN JOIN?

C is a programming language that's considered relatively easy to learn, making it a good choice for beginners. It's a flexible language that's used for many tasks, including developing high-level programming and low-level systems.

C++ Programming

Duration : 30 Days

SUMMARY

C++ is a general-purpose programming language that's used to create software. Some of its key features include:

- Object-oriented.
- Cross-platform.
- High performance.
- Compiler-based.

LEARNING OBJECTIVES

- Object Oriented Programming
- Variables & Data Types
- Classes & Objects
- Operators & Expressions
- Constructors & Destructors
- Functions
- Operator Overloading
- Exception Handling

WHO CAN JOIN?

Anyone can learn C++, but it can be more difficult for those without prior programming experience. It can take at least three months to learn the basics of C++ if you're a beginner with no programming experience.

```
#include <iostream>
using namespace std;
int main()
{
    cout << "Hello World" << endl;
    return 0;
}
```

Annotations:

- Header file (points to `#include <iostream>`)
- Standard namespace declaration (points to `using namespace std;`)
- The `main()` function (points to `int main()`)
- Opening and closing curly braces (points to `{` and `}`)
- Terminate the `main()` function (points to `return 0;`)
- Output "Hello World" console and end the (points to `cout << "Hello World" << endl;`)

C#

Duration : 45 Days

SUMMARY

C# is a general-purpose programming language that's used to write performant code. It's an object-oriented language that's primarily used on the Windows .NET framework, but can also be used on open source platforms.

- Polymorphism
- Inheritance
- File Input and Output
- Exception Handling
- Creating Multithreaded Applications
- Delegates and Events
- Attributes and Reflection

LEARNING OBJECTIVES

- Introduction to .NET Framework
- Introduction to the Object-Oriented Approach
- Creating Objects
- Operators and Programming Constructs
- Encapsulation and Abstraction
- Creating Value Types and Reference Types
- Constructors and Destructors

WHO CAN JOIN?

Anyone can learn C#, including beginners, kids, and experienced programmers:

- Beginners
- No coding experience
- Intermediates
- Experienced programmers
- All levels

MS - Office

Duration : 45 Days

SUMMARY

Microsoft Office is a collection of applications that help people complete tasks and be more productive. Microsoft Office can be used for creating documents, presentations, spreadsheets, and more.

LEARNING OBJECTIVES

Microsoft Word

- Text Formatting
- Paragraph Formatting
- More Ways to Format Text and Paragraphs
- Style Formatting
- Page Formatting
- Templates
- Working With Graphics and Pictures

Microsoft Excel

- Working with formulas
- Working with graphics
- Working with hyperlink
- Working with chart
- Sorting, filtration and validation

Microsoft PowerPoint

- Setting Options & Saving Files
- PowerPoint Design Essentials
- Changing Backgrounds
- Placeholders & Bullets
- Adjusting Placeholders
- Adding Headers & Footers

WHO CAN JOIN?

Anyone can learn Microsoft Office, and there are many resources available to help you do so.

ADVANCED EXCEL

Duration : 30 Days

SUMMARY

Advanced Excel skills include the ability to perform complex calculations, use spreadsheets efficiently, and process large amounts of data.

LEARNING OBJECTIVES

- Introduction to Advance Excel
- Grouping & Outlining and Subtotals
- Conditional formatting
- Index and Match Function
- Column Function
- Date and Time
- What-If Analysis
- Data Validation
- Pivot Tables
- Charting Pivot Data
- VLOOKUP and HLOOKUP

WHO CAN JOIN?

Anyone can learn advanced Excel skills, including people from a variety of backgrounds, such as:

- Students, teachers, and researchers
- Professionals
- College students
- Data analyst
- Financial analyst
- Accountant

TallyPrime

#MakeEveryDaySimple

TALLY PRIME

Duration : 45 Days

SUMMARY

TallyPrime is a business management software that helps small and medium-sized businesses manage their accounting, inventory, banking, taxation, and payroll. It's an upgraded version of Tally ERP, a widely-used accounting software.

LEARNING OBJECTIVES

- Fundamentals of Tally
- Accounting and Inventory in Tally Prime
- Advanced Accounting Features
- Job Costing
- Different Actual and Billed Quantities
- Defining Bill of Materials
- Reorder Level
- Stock Transfer

- Bill of Material
- Price Level and Price Lists
- Stock Valuation
- GST
- Taxation

WHO CAN JOIN?

Anyone can learn Tally Prime, but it can be especially useful for people with the following backgrounds:

- Students
- Graduates
- Small business employees
- Commerce students

SAP

Duration : 45 Days

LEARNING OBJECTIVES

SAP FICO

- Organization Structure
- Financial Accounting Global Settings
- General Ledger
- Accounts Payable
- Accounts Receivable
- Asset Accounting
- Controlling
- Cost Element Accounting
- Cost Centre Accounting
- Internal Order Accounting
- Profit Center Accounting
- Cost posting to Profit Center
- Integration of FI with MM module
- Integration of FI with SD module

SAP MM

- SAP Introduction
- Organization Structure Part 1, Part 2 and Part 3
- Controlling
- Master Data
- Material Master
- Vendor Master and Info Record
- Source List and Quota Arrangement
- Purchase Order Part 1 and Part 2
- Purchasing Configuration
- Purchase Requisition
- Request for Quotation
- Contract Part 1, Part 2
- Schedule Agreement
